

February 2020 Workshops

Trauma Informed Care: Understanding the Impact of Trauma & Identifying Strategies to Promote Health Part 2

I Saturday I February 8, 2020 I 9:00am–12:00pm I \$10/per person

Trauma occurs when a child witnesses or experiences an event with real or perceived threats to their or someone else's life, safety and well-being. Overwhelmed and unable to effectively cope with the trauma, the child may feel helpless, become fearful, become agitated, or confused. This workshop will help you identify key strategies that we can use to support children, build their resilience, and minimize the adverse effects of trauma.

Presented by: Jeanette Bellerive, M.A. and Carla Rosas

Cognitive Development

I Thursday I February 13, 2020 I 6:30pm–9:30pm I \$10/per person

The first three years of life are a period of incredible growth in all areas of a baby's development, but most dramatically within an infant's brain. Throughout the first 3 years, an infant's brain creates hundreds of trillions of connections, or synapses. In this workshop we will explore the structure of brain development including how infants are "wired" for learning.

Presented by: Jeanette Bellerive M.A.
